

**Cablcon Fiber Optic Cleaning Products**

A clean connection is a requirement for maintaining an error-free fiber optic network. Dust, lint, oil or other foreign particles may obscure an end face, compromising the integrity of the optical signal. Therefore, it is essential that fiber optic users develop the necessary disciplines and habits to ensure clean connections during the manufacturing, testing, installation and maintenance of fiber optic connections.

Cablcon is pleased to offer Senko products to support your fiber optic cleaning needs.

**FEATURES**

Senko Smart Cleaners are dry cloth cleaners specially designed to clean single fiber connectors residing in an adapter, faceplate or bulkhead. Senko Smart Cleaners are simple to use and highly effective at removing oil and dust contaminants that can negatively impact optical performance.

| Description  | Part Number     |
